

ValueCore™

SMOOTH, VERSATILE BIRCH PANELS

Columbia Forest Products is proud to introduce ValueCore™, our new birch-faced, multi-purpose panel. ValueCore provides the uniform attributes of engineered composite crossbands, at a price and grade that makes it an excellent value. These 4'x 8' panels are CARB PI compliant and ready to ship.

Features & Benefits

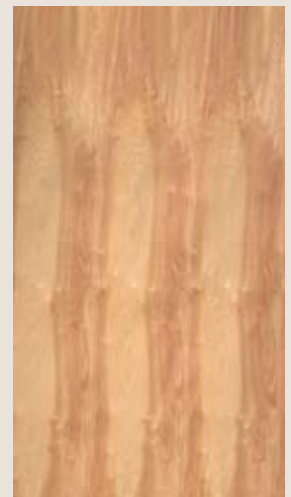

- **MDF Crossbands** hide or eliminate show-through of inherent characteristics in veneer core substrates.
- **Oversized Panels:** Our panels are 48.5" x 96.5", allowing for flexibility and optimization.
- **Finish:** No matter if you use pre-finished panels or apply the finish in the shop, you will notice the smoother, richer look that ValueCore provides.
- **Grade:** C-2 or better (you'll notice some B faces and I backs). A "higher end" commodity panel.
- **Species:** Available in Natural Birch only, the most requested commodity species.
- **CARB PI compliant:** From a source you can trust.
- **Special orders:** If you need a specific thickness, species or grade, call us and we will build our ClassicCore IV panel made to your specifications.

ValueCore C-2 Whole Piece Natural Birch Face with UV clear coating

Specifications

- **Construction:** Hardwood plywood face and back, crossbands are 1/10" MDF, core is domestic hardwood veneer.
- **Thickness:** 3/4"
- **Species:** Natural Birch only
- **Grade:** C-2 or better
- **Panel Size:** 48.5" x 96.5"

Typical C-2 Natural Birch Face

ValueCore™ is a new combi-core panel construction featuring thin MDF crossbands under the face and back to provide exceptional smoothness on the natural birch veneer face. This panel offers the hard-working grade you need and the species you want at an exceptional value. This combination makes ValueCore the obvious choice for those jobs requiring a combi-core but need the quality and peace of mind that only Columbia Forest Products can offer.

ValueCore: Value. Service. Trust.
