

MPX[®]

Smooth, Domestic, All-Wood Core

Introducing MPX[®], the smooth, new surface innovation from Columbia Forest Products

This veneer core plywood panel features Meinan[®]-peeled hardwood crossbands under the decorative face and back, to introduce a new standard in all-wood veneer core panel surface quality. It reduces telegraphing, making MPX better for finishing and applications where a smooth, even face is desired. Of course, standard construction includes soy-based PureBond[®] formaldehyde-free technology.

 PureBond.[®]
FORMALDEHYDE-FREE TECHNOLOGY

FOREST PRODUCTS[™]

MPX® answers the demand for a smoother veneer core panel.

MPX uses hardwood crossbands and is made with PureBond® formaldehyde-free technology.

The result? MPX panels have a smoother, more consistent surface quality than panels constructed with rougher softwood crossbands - and meet the highest standards for indoor air quality materials.

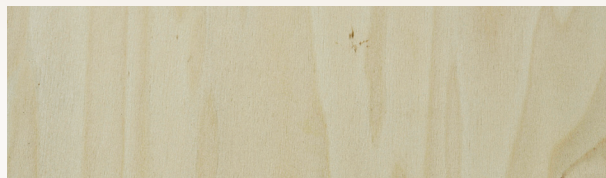

This makes MPX panels the smoothest domestically-produced, all-wood core in North America.

MPX is perfect for standard fabrications but is highly recommended for pre-finished panels with high visibility requirements. Fabricators will experience less “fall down” scrap, reworks and callbacks. Producing finer finished goods with higher customer satisfaction can also encourage positive referrals.

Compare for yourself:

Our exclusive Meinan-peeled hardwood crossbands offer a much smoother face as compared to crossbands of white fir, douglas fir, red pine, white pine and other coarse woods that might be found in a veneer core plywood panel.*

Typical MPX Hardwood Crossband Face

Typical Softwood Crossband Face

Features & Benefits

- Uses hardwood crossbands beneath the face and back to reduce the potential for core “telegraphing.”
- Smoothest crossbands in the hardwood plywood industry for veneer core construction.
- Improved surface is engineered for even finishing results.
- Reduces fabricator shop waste, callbacks and reworks.
- Cost competitive, all-wood core construction.
- Standard veneer core with A & B grade faces and C grade when specified. Offering is on 4X8 in 3/4”, 19.5mm, and 1” constructions. Also an option in 3/8” and 5/8”.
- MPX crossbands are peeled exclusively on Meinan® lines, the latest in lathe technology.
- MPX panels are made with PureBond formaldehyde-free technology, to meet CARB standards and contribute to LEED® green building credits.
- FSC® certified upon request.
- Produced in North America exclusively by Columbia Forest Products.

MPX offers a better quality surface for the decorative face.

MEINAN LATHE LINES NOW IN OLD FORT, NC., CRAIGSVILLE, WV, AND BOARDMAN, OR.

*MPX panels may include other wood species between the Meinan-peeled hardwood crossbands.
