

Why does Columbia do this?

- Satisfy the demand for green building products
- Ensure a reliable supply of FSC®-certified timber through long term partnerships
- Demonstrates our commitment to supply PureBond® formaldehyde-free panels constructed with third-party certified wood.

Basic entry guidelines:

- High percentage yellow poplar, cucumber, basswood and sycamore
- Timber merchantable within five years
- 2,500 board foot per acre of harvestable timber
- Legal access to property
- Legally owned with intent to manage

Do you qualify?

- Call or send us an email. We'll set up a visit to explain our offer and review your options.

A log landing that was revegetated to create a wildlife food plot after completion of logging, promoting multiple land use.

Columbia Forest Products is the leading manufacturer of hardwood plywood and hardwood veneer across the United States and Canada.

Why should you manage your forest lands?

- › Generate economic return
- › Commitment to Forest Stewardship
- › Improve wildlife habitat
- › Improve access for recreation
- › Maximize tree growth
- › Improve biodiversity
- › Secure tax advantages

What does Columbia Forest Products offer you?

- › Foresters who are part of our FSC-certified resource management team
- › Your objectives prioritized in development of management plan
- › Weekly oversight of logging activity
- › Third party audits of your managed forest conducted by the Rainforest Alliance
- › Foresters who care about proper timber harvesting and responsible forest management

"I am really pleased with the outcome of the Columbia management program. I can see the management will pay off with an even better stand of timber and revenue during the next harvest."

Les Facemyer, Ripley, WV

Examples of **proper** forestry practices

Group selection

Hardwood thinning

Single tree selection

Examples of **improper** forestry practices

Too many skid roads

"High-Graded," only the best trees were harvested

Erosion caused by improperly seeding a log landing
