ARCHITECTURAL PANELS

As shown:
Clear Birch
painted white
with taupe stain

Textured, real wood panels that beg to be felt as much as seen.

With a rich, tactile quality that pleases the senses, TouchWood™ hardwood panels provide an inspiring surface for today's texture-driven interior trends. The Rough Sawn series is available in two styles of Red Oak and Birch, giving your ideas a broad range of visual expression.

Innovating Responsibly.™

These new Rough Sawn wood panels are unique to the woodworking market. Fabricators and designers are encouraged to ask for samples they can finish to assure client expectations. Care should be given to the unique effect of the surface qualities and seam lines on the finished look of these unique panel faces.
