touchwoodTM
ARCHITECTURAL PANELS

Enhanced Grain

FEATURES and BENEFITS:

- Natural look, feel & magic of genuine hardwood
- Customizable with your own colors, stains & finishes
- Supports rustic to contemporary looks
- Real wood = each panel is unique
- No repeating patterns unlike melamine and laminate
- PureBond® formaldehyde-free laminating technology
- Available in all typical CFP faces, cuts and grades (White Oak shown)
- 4'x8' panel size
- Available FSC® Certified upon request
- Made in North America

**Only real wood
looks and feels like real wood.**

Real hardwood offers a timeless aesthetic only found in nature, and the TouchWood Enhanced Grain™ option takes that truth to a new level. Crafted to boost the visual and tactile appeal of richly grained hardwoods, Enhanced Grain faces are available in all CFP faces (open-grained species such as White Oak are recommended) in a versatile selection of grades and cuts. Your custom finishing treatments offer endless possibilities in commercial and residential interiors. For wall treatments, furniture, case goods and cabinetry, this is wood like you've never felt before.
