## Only real wood looks and feels like real wood.

Real hardwood offers a timeless aesthetic only found in nature, and the TouchWood Enhanced Grain™ series takes that truth to a new level. Crafted to boost the visual and tactile appeal of richly grained hardwoods, Enhanced Grain faces are available in all CFP faces (open-grained species such as White Oak recommended) and in a versatile selection of grades and cuts. Your custom finishing treatments offer endless possibilities for commercial and residential interiors. For wall treatments, furniture, case goods and cabinetry, this is wood like you've never felt before.

### Features and Benefits

- Natural look, warm touch & Magic of genuine hardwood.
- Customizable with your own colors, stains and finishes
- Supports looks from rustic to contemporary
- Real wood means each panel is unique with pleasing patterns and consistent colors and grades from the leading Hardwood Plywood and Veneer manufacturer in North America.
- PureBond® formaldehyde-free assembly technology
- Oaks, American ash, black walnut and other open-grain woods work best (white oak shown)
- 4' x 8' size available on any Columbia core type
- Available FSC® Certified upon request
- Made in North America
