

## RUSTIC OR REFINED...

The fine, light grain pattern and consistent color of **Columbia Alder veneer**, in a range of grades primarily planked and offering limited bookmatched appearance options that creates the aesthetics to enhance most unique projects.

Pleasing, uniform colors with hues from honey to pale brown with little visible boundary between heart and sap.

## MAKING THE GRADE

Photos depict a representative range to expect when specifying grade.

**A GRADE**

**B GRADE**

**C GRADE**

**BOOK MATCH**

Our **A Grade** provides the cleanest and most uniform combination of natural characteristics and color within the Columbia Alder offering.

Our **B Grade** provides a happy medium in alder, with a balanced combination of natural characteristics.

Our rustic **C Grade** provides the most concentrated level of natural characteristics within the Columbia Alder offering.

While alder is most commonly plank-matched, Columbia Alder can be specified as a **book match**. The photo at right depicts a representative range of color and natural characteristics to expect when specifying this match.

## FEATURES & BENEFITS

- Lengthwise sliced alder veneer is from responsibly sourced, hand-selected, Pacific Northwest alder lumber to ensure **consistent, reliable grades of veneer, year-round.**
- **CARB/TSCA Title VI certification** provides assurance. Panels qualify for LEED® project work. To specify constructions without formaldehyde, request PureBond® panel construction with Formaldehyde-free pMDI cores.
- **FSC® MIX:** Can be specified as FSC® Mix at time of order placement to confirm independent certification to standards set forth by the Forest Stewardship Council® for certified, responsible wood sourcing
- **Hundreds of millions of panels** produced with PureBond—a proven solution.
- Over **65 years of making** the industry's superior hardwood plywood.
